

mas110 fundamentals of computational media design
PS8

Instructions

Problem 1

Take one piece from your "Vote for ME" assignment and write about 250 words that describe the background behind your thought, the process in which you executed the thought, and what kind of impact you wished it to have in the mind of the beholder. Please choose the most effective piece (in your mind)—in general your image sequences were the most interesting (albeit disturbing).

Problem 2

Take two pieces from your PEACE/WAR assignment and write about 250 words for each piece (total 500 words) that describe the background behind your thoughts, the process in which you executed the thoughts, and what kind of impact you wished the piece to have in the mind of the beholder. By two I mean not a PEACE/WAR pair, but a single instance.
