

# WeeklyAssignment7

-- **MitchelResnick** - 26 Oct 2004

There are two assignments for this week:

1. Write a proposal for your final project. (If several of you are working on the project together, each of you can post the same proposal.)
2. Find an example of a Web-based tool that supports creative design and/or creative collaboration. Post the URL, with a short description of how the site supports creative learning. (Several examples are listed on the class website.)
