

THE MIT OPENCOURSEWARE PROGRAM

MIT OpenCourseWare (OCW) is a large-scale, Web-based publication of the educational materials from virtually all of the MIT faculty's courses. This unique initiative enables the open sharing of MIT teaching materials with educators, enrolled students, and self-learners around the world.

OCW provides open access to the core academic content — syllabi, lecture notes, course calendars, problem sets and solutions, exams, reading lists, and even a selection of video lectures — from MIT courses representing 33 academic disciplines and all five of MIT's schools. As of June 2010, the initiative includes materials from more than 2,000 courses, presenting virtually the entire curriculum of the Institute.

Educators around the globe are encouraged to utilize the materials for curriculum development, and self-learners and students may draw upon the materials for self-study or supplementary use. Course materials contained on the OCW Web site may be freely used, copied, distributed, translated, and modified by anyone, anywhere in the world for non-commercial purposes.

Truly a global initiative, OCW materials have been visited by more than 71 million individuals to date. Visitors have come to the site from more than 215 countries, territories, and city-states around the globe—including every member of the United Nations—and materials already have been translated into at least ten different languages.
