SP.777 Assignment 9: Documentation II

1 - First Draft of your section of the written report. This should be directed at peers and fellow students/designers. We are trying to explain the process we went through and all of the details that are relevant to the development of the products we are producing. Think of it as a report to your boss at a company - explain why we made the choices we did and tell us how the product came about in both planning and production. Show the steps we took and be as clear as possible. Feel free to divide your section into smaller, subheaded sections if it gets the point across better. (no page number requirement - the shortest document that explains the process and results clearly.)

The report will be used to supplement our web page and will also be the basis for your presentation to the rest of the PSDS seminars.

2 - Transfer all relevant files (OMAX, any notes you have typed up, etc) to the sp.777 class locker

3 - Continue to think about product names
