

2.43 Advanced Thermodynamics

MIT - Spring2024 - Gian Paolo Beretta

References format: LL^YSS = slide #SS of lecture #LL.

Hyperlinks: **s** takes you to the slide; **v** to the video.[‡]

[‡]To have your computer or smartphone open the target PDF files at the proper page, you may have to change the default settings. For example:

- In PC **Chrome**: Settings → Privacy and Security → Site Settings → PDF documents, and choose to open PDFs in Chrome.
- In PC **Firefox**: Preferences → General → Applications → Portable Document Format (PDF), and select “Open in Firefox”.
- In some Android smartphones, download the **Firefox** app, then: Settings → Applications → Firefox → “Set as Default”, and choose Firefox.

Analytical Index of Lecture and Slide Topics with Hyperlinks to Slides and Video Timestamps

A	
Activated complex	19 ^Y 08, 20 ^Y 02, 20 ^Y 08
Active matter	25 ^Y 18
Activities and activity coefficients	16 ^Y 12
Adiabatic availability	
definition	02 ^Y 23
graphical representation	03 ^Y 21, 04 ^Y 03
of mixing ideal gases ...	12 ^Y 14, 12 ^Y 15, 13 ^Y 08, 15 ^Y 04
Adiabatic flame temperature in a closed	
combustion chamber	18 ^Y 25, 18 ^Y 27, 19 ^Y 20
Adiabatic flame temperature in an open	
burner	18 ^Y 22
Adiabatic process	
definition	05 ^Y 04
versus weight process	05 ^Y 04
Advanced Thermodynamics, 2.43	
Course introduction	01 ^Y 01
Course objectives, Part 1	01 ^Y 05
Course objectives, Part 2	01 ^Y 06
Course objectives, Part 3	01 ^Y 07
Grading policy	01 ^Y 08
Affinity	
and degree of disequilibrium	20 ^Y 13
and direction of reaction	20 ^Y 14
and reaction rates	21 ^Y 03, 21 ^Y 05
De Donder	19 ^Y 11
entropic versus energetic	20 ^Y 04
of a reaction	19 ^Y 12
Allocation methods	
in heat and power cogeneration ...	10 ^Y 25, 11 ^Y 16
in hybrid solar-fossil power production ..	10 ^Y 38, 11 ^Y 23
Amagat law of additive volumes	12 ^Y 12
Anand, Lallit	22 ^Y 04
Anisotropic Fourier conduction	21 ^Y 17, 21 ^Y 19
Antanovskii, Leonid K.	25 ^Y 24
Arrhenius law and activation barrier	20 ^Y 10
Availability function	
and related stability conditions	06 ^Y 22
general concept	06 ^Y 20
graphical representation	06 ^Y 21, 07 ^Y 13
w.r.to a fixed V and n reservoir ...	06 ^Y 19, 07 ^Y 12
w.r.to a fixed V and variable n_i reservoir	07 ^Y 19
w.r.to a variable V and n reservoir	07 ^Y 21
w.r.to a variable V and fixed n reservoir	07 ^Y 17
Available energy	
and its related availability function	06 ^Y 20, 07 ^Y 12
graphical representation	03 ^Y 25, 04 ^Y 05, 06 ^Y 21, 07 ^Y 13
w.r.to a fixed V and n reservoir ..	02 ^Y 33, 06 ^Y 20,

07_s:12
w.r.to a fixed V and variable n_i reservoir 07_s:19
w.r.to a variable V and \mathbf{n} reservoir 07_s:21
w.r.to a variable V and fixed \mathbf{n} reservoir 06_s:19,
07_s:17

Average kinetic energy versus temperature.. 03_s:18
Avogadro's number 13_s:11
Azeotrope 16_s:15

B

Balance equations for a continuum
of a generic extensive property..... 22_s:06, 22_s:09
of the main extensive properties 23_s:04
one-dimensional heat and mass transfer . 22_s:05
Reynolds theorem..... 22_s:09
Balancing the stoichiometric coefficients..... 18_s:09
Baricentric velocity 22_s:08, 22_s:11
Bedeaux, Dick..... 22_s:12, 23_s:15, 25_s:22
Bejan, Adrian 23_s:27, 23_s:35
Binodal miscibility curve 17_s:07
Blue energy, osmotic power..... 14_s:11
Boiling point elevation..... 16_s:06
Boltzmann constant..... 13_s:11, 13_s:13
Boltzmann, Ludwig 01_s:03
Brownian motion..... 25_s:12
Bubble chamber 15_s:20
Bubble line 16_s:04, 16_s:15, 17_s:03
Bulk viscosity 23_s:14
Bulk-flow
and local equilibrium 23_s:03, 23_s:06
and partial energy 24_s:04
interaction..... 08_s:17
state 08_s:17

C

Cahn-Hilliard square-gradient model 25_s:24
Callen, Herbert B. 02_s:42
Canonical distribution of probabilities . 13_s:13, 13_s:14
Caratheodory, Constantin 01_s:03

Carnot coefficient 05_s:06, 05_s:13
Carnot, Nicolas Leonard Sadi, 200th anniversary
of the birth of Thermodynamics 01_s:02,
01_s:03, 25_s:26
Cattaneo-Vernotte heat conduction equation 21_s:20
Centrifuges for uranium enrichment 15_s:12
Characteristic SES functions 06_s:13, 06_s:17, 07_s:03
Charge densities in terms of mole and mass
fractions and molar and mass
densities 22_s:11
Charge density 23_s:08
Charge flux
definition in "Heat&Diffusion"
interactions 22_s:24, 24_s:03
Chemical equilibrium
complete..... 19_s:23
Gordon-McBride NASA computer code . 19_s:23
necessary condition 19_s:16, 19_s:22
pH and pOH of pure water..... 20_s:06
stable equilibrium states 19_s:11
Chemical kinetics vs heat conduction..... 22_s:03
Chemical kinetics 19_s:08, 20_s:07
Chemical potential
and multicomponent equilibria..... 11_s:29
as functions of T and p 05_s:25
definition 02_s:42, 03_s:14
equality at mutual equilibrium..... 03_s:15
for ideal gas mixtures..... 12_s:11
for ideal solutions 14_s:04
ideal and excess 16_s:09
van'f Hoff relation 14_s:05
Chemical reaction
direction of spontaneous process 18_s:12
exergy 18_s:16
maximum work obtainable 18_s:16
minimum work required 18_s:16
Clausius inequalities
and irreversibilities 05_s:11

generalized proof.....	22 _s 22
graphical proof.....	05 _s 02
proof.....	04 _s 23, 05 _s 02, 22 _s 20
Clausius, Rudolf	01 _s 03
Clausius-Clapeyron relation	09 _s 24, 16 _s 06
Climate4you.com website	15 _s 10
Cloud chamber	15 _s 20
CO ₂	
concentration at sea level.....	15 _s 09
concentration with elevation	15 _s 09
removal from atmospheric air, minimum work required.....	14 _s 14
stored in bottom layers of oceans	15 _s 10
Cogeneration	08 _s 35, 10 _s 25, 11 _s 09, 11 _s 10
Coherent light.....	20 _s 21
Coleman-Noll procedure	22 _s 04
Collisions in reacting systems	19 _s 07, 20 _s 09
Combined heat and power (CHP).....	10 _s 25, 11 _s 10
Compatible compositions, meaning	19 _s 04
Compatible values of amounts of constituents	19 _s 04
Complete chemical equilibrium.....	19 _s 23
Compressibility factor	15 _s 17
Constructal law of design and evolution in Nature	23 _s 35
Continuum approximation.....	22 _s 14, 25 _s 17
Convective fluxes.....	22 _s 08, 22 _s 10, 23 _s 02
Cornish engine	10 _s 19
Covalent bond strength versus Van der Waals forces	17 _s 17, 18 _s 07
Cross effects	
between vectorial forces and fluxes	25 _s 05
summary and Curie principle	23 _s 15, 24 _s 02, 25 _s 02
thermo-diffusive.....	25 _s 10
thermo-electric.....	24 _s 07, 25 _s 06
thermo-osmosis	25 _s 08
thermophoresis.....	25 _s 13
Curie symmetry principle.....	23 _s 15
Curie, Pierre	23 _s 15, 24 _s 02

Current density and diffusive flux of charge .	23 _s 08
Cyclic relation.....	07 _s 09

D

Dalton law of additive partial pressures	12 _s 10
Darcy law of permeability	25 _s 09
De Donder affinity, see also Affinity.....	19 _s 11
De Groot, Sybren Ruurds	01 _s 03, 22 _s 23
Degree of disequilibrium	
in chemical kinetics.....	20 _s 13, 20 _s 18
in entropy production density	23 _s 07
in local near equilibrium	24 _s 06
in steepest entropy ascent	23 _s 31
Desalination of seawater	14 _s 10
Detailed balance principle	20 _s 13
Dew line	16 _s 04, 16 _s 15, 17 _s 03
Dewar, Roderick	23 _s 27
Diffuse interface modeling of spinodal decomposition.....	15 _s 21
Diffuse-interface model	23 _s 15, 25 _s 24
Diffusion	
Darcy's law	25 _s 09
Fick's law	23 _s 15, 24 _s 02, 25 _s 12
Maxwell-Stefan law	25 _s 12
self-diffusion.....	25 _s 12
thermophoresis.....	25 _s 14
Diffusive fluxes	22 _s 08, 22 _s 10, 23 _s 02, 24 _s 04, 25 _s 04
Directional pressured for a single particle in a box.....	13 _s 16
Dissipation function	23 _s 07
Dissipation metric in nonequilibrium dynamics	23 _s 19
Distillation	16 _s 05
District heating in Brescia.....	08 _s 35
Divers' decompression sickness (the bends)..	17 _s 05
Dufour effect	23 _s 15, 24 _s 02, 25 _s 15
Duhem, Pierre.....	01 _s 03
Duhem-Margules relation	11 _s 37, 16 _s 09

E

Efficiency in the production of heating 10_s^v13, 10_s^v25,
11_s^v08, 11_s^v15, 11_s^v17

Einstein, Albert 01_s^v03

Electrochemical potential 14_s^v17, 15_s^v13

Electrochemical systems 25_s^v21

Electromagnetic radiation carries energy and
entropy 24_s^v05

Energy

additivity 01_s^v19

and the first law of Thermodynamics.... 01_s^v18,
02_s^v11

balance equation 01_s^v21, 02_s^v12, 03_s^v03, 08_s^v26, 17_s^v13,
18_s^v03

conservation 01_s^v19

definition 01_s^v18, 02_s^v11, 03_s^v02

exchangeability via interactions 01_s^v20

flux carried by electromagnetic radiation 24_s^v05

notation for exchanges between systems. 01_s^v21

Energy performance a residential building... 10_s^v25

Energy vs entropy diagram

adiabatic availability 03_s^v21, 04_s^v03

adiabatic flame temperature 18_s^v27

available energy 03_s^v25, 04_s^v05

definition 03_s^v16, 04_s^v02

energy, entropy, and exergy of combustion 18_s^v27

enthalpy and entropy of reaction 18_s^v06

for a seven level quantum system 13_s^v14

graphical proof of Clausius inequalities.. 04_s^v28,
04_s^v29, 05_s^v02

negative temperatures 03_s^v19, 13_s^v14

states of a thermal reservoir..... 03_s^v23, 04_s^v04

Energy-entropy-volume diagram for water... 09_s^v27

Enthalpy

definition 05_s^v21, 06_s^v14

in bulk-flow interaction 08_s^v21

of isothermobaric mixing 06_s^v14, 16_s^v09

Enthalpy

of formation vs bond energy 17_s^v16, 18_s^v06, 19_s^v11

Entropy

additivity 02_s^v35

balance equation 02_s^v38, 03_s^v09, 08_s^v26, 17_s^v13

definition 02_s^v32, 03_s^v06

engineering meaning 02_s^v34, 03_s^v07

exchangeability via interactions 02_s^v37

flux carried by electromagnetic radiation 24_s^v05

generated in mixing ideal gases ... 12_s^v13, 13_s^v07,
15_s^v03

in terms of probabilities 13_s^v12

in terms of quantum probabilities . 13_s^v13, 13_s^v14

of isothermobaric mixing 12_s^v05, 16_s^v09

of radiation..... 10_s^v43, 24_s^v05

of solar radiation..... 24_s^v05

of spontaneous mixing of ideal gases 12_s^v13, 13_s^v07,
13_s^v11

principle of non-decrease in a weight
process..... 02_s^v35

Entropy balance in fluid mechanics 23_s^v04

Entropy production density

force-flux shorthand notation 23_s^v11

general expression for a continuum 23_s^v06

general expression in terms of heat flux and
current density 23_s^v08

general expression in terms of heat flux . 23_s^v07

in steady-state heat transfer 21_s^v15

in steepest entropy ascent 23_s^v31

in terms of relative diffusive fluxes and
forces 24_s^v06, 25_s^v04

Equation of state..... 05_s^v23

Equilibrium constant

dependence on temperature 19_s^v17

for pure water 20_s^v06

from properties of formation 19_s^v18

in non-equilibrium law of mass action ... 20_s^v05

in terms of activities..... 19_s^v16

in terms of concentrations	19 _s ^y 14	10 _s ^y 08, 11 _s ^y 03
in terms of mole fractions	19 _s ^y 14	minimum for low temperature heating ..
Equipartition theorem	13 _s ^y 16	11 _s ^y 04
Equivalence ratio	18 _s ^y 18	of a fossil fuel
Euler free energy		10 _s ^y 14, 18 _s ^y 27
and minimum work of partitioning a small		of a hydraulic jump
system	09 _s ^y 10	10 _s ^y 07
and mixture properties	11 _s ^y 37	of hydrocarbons
and properties of small systems	09 _s ^y 09	18 _s ^y 22
definition	06 _s ^y 14	of solar radiation
equal to zero in the simple-system (large n		10 _s ^y 43
limit) model	11 _s ^y 34	transfer in a bulk-flow interaction ..
how to measure it for small systems	09 _s ^y 09, 09 _s ^y 10	09 _s ^y 33, 10 _s ^y 03
importance for small systems	11 _s ^y 31	transfer in a heat interaction
physical interpretation	09 _s ^y 11	08 _s ^y 33
vanishes in the large n limit	11 _s ^y 32	various forms
Euler free entropy		10 _s ^y 01
definition	06 _s ^y 17	Extensive property
Euler relation		09 _s ^y 13, 22 _s ^y 12
for a pure substance	11 _s ^y 34	F
general	11 _s ^y 32	Fermi, Enrico
in terms of molar and mass specific		01 _s ^y 03
properties	22 _s ^y 16	Feynman, Richard P.
in terms of volume specific properties ...	22 _s ^y 17	01 _s ^y 20
proof	08 _s ^y 15, 09 _s ^y 07	Fick interdiffusion coefficient
Excess air	18 _s ^y 18	25 _s ^y 12, 25 _s ^y 14
Excess chemical potential	16 _s ^y 09	Fick law of molecular diffusion ..
Excess entropy of isothermobaric mixing	16 _s ^y 09	23 _s ^y 14, 23 _s ^y 15, 24 _s ^y 02,
Exergy		25 _s ^y 15
and direction of chemical reaction	18 _s ^y 12, 18 _s ^y 15,	First law of Thermodynamics
18 _s ^y 16		and the definition of energy
and second-law efficiency	08 _s ^y 35, 09 _s ^y 32	01 _s ^y 18
balance equation	08 _s ^y 28, 10 _s ^y 09	and the law of time evolution
dissipation in a continuum	23 _s ^y 10	01 _s ^y 13
dissipation in steady-state heat transfer .	21 _s ^y 15	general statement
general concept	08 _s ^y 27, 08 _s ^y 28, 08 _s ^y 32	01 _s ^y 16
in chemical reactors	18 _s ^y 16, 18 _s ^y 27	main consequences
in heating and cooling of bulk flows	10 _s ^y 05,	01 _s ^y 18
		First-law efficiency
		for a heat engine
		05 _s ^y 13
		for a heat pump
		05 _s ^y 15
		for a refrigerator
		05 _s ^y 14

proof of Euler relation.....	08 _s ^v 15	Stability conditions	
rarefaction effects near walls	08 _s ^v 08, 09 _s ^v 03	and availability functions....	06 _s ^v 22, 06 _s ^v 24, 07 _s ^v 14,
valid in the macroscopic limit	08 _s ^v 07	07 _s ^v 18, 07 _s ^v 20, 07 _s ^v 22, 07 _s ^v 24	
Small scale hydrodynamics	25 _s ^v 24	and LeChatelier-Braun principle ..	06 _s ^v 25, 07 _s ^v 16,
		07 _s ^v 26	

for a partially miscible mixture	16 _s ^v 11, 17 _s ^v 07	implies Onsager reciprocity	23 _s ^v 20
Stable equilibrium state		in anisotropic heat conduction	23 _s ^v 19
definition	01 _s ^v 24	maximum entropy production rate	
for systems with chemical reaction	19 _s ^v 05	principle	21 _s ^v 09
heterogeneous	09 _s ^v 16	model of relaxation toward SES	15 _s ^v 08
homogeneous	09 _s ^v 16	nonequilibrium Massieu operator	23 _s ^v 31
properties depend on n , for small systems	09 _s ^v 09	orthogonality condition	23 _s ^v 30
properties of a pure substance (large n) .	06 _s ^v 11,	variational statement	23 _s ^v 32
11 _s ^v 34		versus GENERIC	23 _s ^v 33
properties of a pure substance (small n)	06 _s ^v 11,	versus gradient flows.....	23 _s ^v 33
11 _s ^v 33		Steepest-entropy-ascent time evolution towards	
properties of mixtures (large n)	06 _s ^v 11, 11 _s ^v 32	stable equilibrium	13 _s ^v 15
properties of mixtures (small n) ...	06 _s ^v 11, 11 _s ^v 31	Stefan-Boltzmann constant	24 _s ^v 05
Standard reversible weight process	02 _s ^v 28	Stevin, Simon	15 _s ^v 09
State changes, law of time evolution ...	01 _s ^v 13, 02 _s ^v 08	Stimulated emission of photons	20 _s ^v 20
State of a system		Stoichiometry	17 _s ^v 14, 18 _s ^v 04, 19 _s ^v 03
definition	01 _s ^v 12, 02 _s ^v 06	Stratification	
equilibrium	01 _s ^v 22, 02 _s ^v 14	of air components in the atmosphere	15 _s ^v 09
metastable equilibrium	01 _s ^v 04, 02 _s ^v 15	of gas and liquid charge carriers in an electric	
nonequilibrium	01 _s ^v 22, 02 _s ^v 14	field	15 _s ^v 13
representation on E - S diagrams	03 _s ^v 18	of ideal gas and liquid mixtures in a	
stable equilibrium	01 _s ^v 24, 02 _s ^v 15	centrifuge	15 _s ^v 11
steady	01 _s ^v 22, 02 _s ^v 14	of ideal gas and liquid mixtures in a gravity	
unstable equilibrium	01 _s ^v 24, 02 _s ^v 15	field	15 _s ^v 08
unsteady	01 _s ^v 22, 02 _s ^v 14	of ideal gas and liquid mixtures	14 _s ^v 17
State principle in reacting systems	19 _s ^v 05	Stress tensor	22 _s ^v 08
State principle	02 _s ^v 41, 03 _s ^v 11	Surface tension and Young-Laplace equation	04 _s ^v 19
Steepest entropy ascent		Surprise	13 _s ^v 12
a “great” principle from Nonequilibrium		Swenson, Rod	23 _s ^v 27
Thermodynamics	23 _s ^v 28	System	
abstract geometrical construction	23 _s ^v 29	definition, for systems with chemical	
and the fourth law of Thermodynamics .	23 _s ^v 25	reactions	19 _s ^v 04
dissipation metric	23 _s ^v 19	definition	01 _s ^v 09, 02 _s ^v 04
entropy production rate	23 _s ^v 31	SES properties for small n	09 _s ^v 02, 09 _s ^v 09
general evolution equation	23 _s ^v 32	simple-system model for large n	08 _s ^v 08
generalized overall degree of		small vs large n limit	08 _s ^v 07, 09 _s ^v 02, 11 _s ^v 31
disequilibrium	23 _s ^v 31	with chemical reactions	17 _s ^v 12, 18 _s ^v 03
graphical illustration	23 _s ^v 21		

T

Temperature

definition for a general SES	02 _s :42, 03 _s :14
definition for a thermal reservoir...	02 _s :29, 03 _s :05
equality at mutual equilibrium.....	03 _s :15
escaping tendency for energy.....	06 _s :05
log-mean, in heating, cooling, boiling and condensing of bulk flows	10 _s :10
measurement	05 _s :17, 06 _s :08
negative	03 _s :19
versus average kinetic energy	03 _s :18
Termodiffusion coefficient	25 _s :14
The bends (decompression sickness)	17 _s :05
Thermal conductivity	
Fourier law of thermal conduction	21 _s :17
of an anisotropic material	21 _s :18
Thermal diffusivity.....	20 _s :21
Thermal reservoir	
definition	02 _s :26
with fixed V and \mathbf{n}	02 _s :33, 06 _s :20, 07 _s :12
with fixed V and variable n_i	07 _s :19
with variable V and \mathbf{n}	06 _s :19, 07 _s :21
with variable V and fixed \mathbf{n}	07 _s :17
Thermo-osmosis effect	25 _s :08
Thermo-osmotic permeability	25 _s :09
Thermocouple	24 _s :12, 24 _s :20
Termodiffusion effects	25 _s :10
Thermodynamics	
much of it applies also to modeling of small systems	06 _s :01
of small systems	06 _s :14
Thermodynamics, what is it?	01 _s :09
Thermoelectric effects	24 _s :07, 25 _s :06
Thermoelectric generator	24 _s :13
Thermometer	05 _s :17
Thermophoresis	25 _s :13, 25 _s :16, 25 _s :20
Third law of Thermodynamics ..	03 _s :16, 03 _s :18, 03 _s :19
Thomson effect.....	24 _s :18

Time evolution towards stable equilibrium ..	13 _s :15
Total potentials	
definition	14 _s :17, 15 _s :13
in heat&diffusion interactions	22 _s :24, 22 _s :25, 23 _s :03, 24 _s :04
Touchette, Hugo	23 _s :27
Transition state	19 _s :08
Transport velocity	
for a generic extensive property	22 _s :08
for energy and entropy	22 _s :08
for mass, barycentric velocity	22 _s :08
Tribus, Myron.....	13 _s :12
Trigeneration	11 _s :13
Triple point of water	02 _s :26
U	
UNIFAC mixture model	16 _s :10
UNIQUAC mixture model.....	16 _s :10
Unstable equilibrium state, definition.....	01 _s :24
Upper bounded vs unbounded energy spectrum	13 _s :14
Uranium enrichment in centrifuges.....	15 _s :12
V	
Van 't Hoff relation for osmotic pressure	14 _s :05
Van 't Hoff, Jacobus	01 _s :03
Van der Waals	
p - V diagram	09 _s :30
cloud and bubble chambers	15 _s :20
forces vs covalent bonds	17 _s :17, 18 _s :07
isotherms and chemical potential	15 _s :19
liquid-vapor spinodal decomposition.....	15 _s :21
metastable and unstable states	15 _s :19
model for a pure substance.....	09 _s :30, 15 _s :18
Van der Waals, Johannes	01 _s :03
Van Laar binary mixture model. 15 _s :14, 16 _s :10, 16 _s :14	
Velocity of transport	
for a generic extensive property	22 _s :08
for energy and entropy	22 _s :08

for mass, barycentric velocity 22_s^v08
 Vibrational levels of the CO2 molecule 20_s^v19
 Viscosity, second coefficient of..... 23_s^v14
 Viscosity, shear vs bulk 23_s^v14
 Viscous dissipation function23_s^v06, 23_s^v07, 23_s^v08,
 23_s^v09
 Volta effect 23_s^v15, 24_s^v02
 Volume of isothermobaric mixing 12_s^v07
 Von Spakovsky, Michael R..... 23_s^v27

W

Water desalination 14_s^v10
 Watt, James 10_s^v19
 Weight process
 criteria for reversibility 02_s^v24, 02_s^v36, 03_s^v08

definition 01_s^v15, 02_s^v09
 standard reversible..... 02_s^v28
 versus adiabatic process 05_s^v04
 Wilson binary mixture model 16_s^v10
 Wilson cloud chamber 15_s^v20
 Wine, alcohol content 14_s^v16
 Work interaction, definition 05_s^v04

Y

Young-Laplace equation for surface tension . 04_s^v19

Z

Zanchini, Enzo 03_s^v22
 Ziegler orthogonality relations...21_s^v09, 21_s^v10, 23_s^v17,
 23_s^v18
 Ziegler, Hans 01_s^v03, 21_s^v09, 21_s^v10, 23_s^v18, 23_s^v27
