

[LIMITED SLIP, "BROKEN GLASS & ALIBIS"]

(SINGING) I don't understand these lies

Please give me a reason why

All you have to show for this is broken glass and alibis

Your convictions undermine

Why don't you just let you die?

Bleeding from the inside

I was thinking suicide

No time, no place, no stories, no lies

No time, no place, no stories, no lies

Just broken glass and alibis

I can see it in your eyes

That your life will never end

They go on and on, my friends

They just go on and on

They just go on and on

They just go on and on

They just go on and on

Lightning flashes in my eyes

Watch as I get hypnotized

Show me what I should do

And surely I will follow through

Worthless pieces of creation

Wandering from devastation

Searching for an unknown truth

That will finally set us loose

That will finally set us loose

That will finally set us loose

That will fucking set us loose

No time, no place, no stories, no lies

No time, no place, no stories, no lies

Just broken glass and alibis

I can see it in your eyes

That your life will never end

They go on and on, my friends

They just go on and on

They just go on and on

They just go on and on

They just go on and on

No time, no place, no stories, no lies

No time, no place, no stories, no lies

Just broken glass and alibis

I can see it in your eyes

That your lives will never end

They go on and on, my friends

They just go on and on.

They just go on and on

They just go on and on

They just go on and on

Contemplating genocide of the emptiness inside

First and last is [? mercy ?]

But that means nothing to me

Always just a minute late

Now, it's on to the guillotine

Down it falls with everything

Without a moment's delay

No time, no place, no stories, no lies

No time, no place, no stories, no lies

Just broken glass and alibi

I can see it in your eyes

That your life will never end

They go on and on, my friends

They just go on and on

They just go on and on

They just go on and on

They just go on and on

And on and on

And on and on

And on and on

And on and on

And on and on

And on and on

Why won't you just die tonight?

Why won't you just die tonight?

And on and on

And on and on

And on and on

And on and on

And on and on

And on and on

Why won't you just die tonight?

Why won't you just die tonight?

Why won't you just die in your motherfucking life?
