

[LIMITED SLIP, "THE END"] If we say goodbye right now

That will be the end

If we say goodbye right now

That will be the end

Let's not say goodbye right now

We'll find some way

We'll find somehow

We'll live on and we'll live on

We'll live on until the end

End, end

We'll live on until the end,

End, end

We'll live on until the end

[INAUDIBLE] Sunday night

It was warm inside it felt so right

[INAUDIBLE] exchanging glance

So timid yet so true

[INAUDIBLE] your brown hair

A special feeling that's just too rare

Fireworks were in the sky

and that's when I knew

If we say goodbye right now

That will be the end

If we say goodbye right now

That will be the end

Let's not say goodbye right now

We'll find some way, we'll find somehow

We'll live on and we'll live on

We'll live on until the end

End, end,

We'll live on until the end

End, end

We'll live on until the end

You're asleep right next to me

Place my hand upon your knee

You glance up while I shut down

And start to stroke your thigh

[? Tough ?] kids we're making out

What comes next, I have no doubt

[INAUDIBLE] the name is wrong

I wonder why you cry

If you say goodbye right now

That will be the end

If we say goodbye right now

That will be the end

Let's not say goodbye right now

We'll find some way

We'll find somehow

You'll move on and we'll move on

We'll move on until the end

End, end

We'll live on until the end

End, end

We'll live on until the end of the race

Through the night

Drugs give me the strength to fight

Your best friend's on top of me

You're lying on my side

Your phone begins to ring

As I make you sick

Won't Scotty ever learn?

It's time to say goodbye?

If we say goodbye right now

That will be the end

If we say goodbye right now

That will be the end

Let's say goodbye right now

We'll find some way

We'll find somehow

We'll live on and we'll live on

We'll live on until the end

End, end

We'll live on until the end

End, end

We'll live on until the end
