

Final Project Guidelines

The final project usually involves a small experiment or other phonetic study, on some topic relevant to the course. Students identify topics through discussion and submit a report on their study.

Here are some examples of titles:

'The Affrication of Stops in Scottish and American English'

'Vowel Duration Before Ejective Stops in Georgian'

'Vowel length does not cue stress in a language with phonemic vowel length: A study of Mi'gmaq'

'Using Formant Synthesis to Investigate Vowel Perception'

'Comparing glides /wa/ /wi/ and /ju/ in Korean and English'

'Individual Phonetic Variation: Affricate Velarization'

'Vowel Reduction in the Thai language'

'Palatalization in Russian'

'Utterance Final Pitch Patterns in Echo and Particle Questions in Chinese'
