

GUNTHER

So I'm Gunther Roland. I'm a professor in the physics department. I have been at MIT for

ROLAND:

about 17 years, have taught Junior Lab for close to 20 semesters, and for the last few years have served as director of Junior Lab. So in that role, we've tried to incorporate a number of new elements in the lab, both in 8.13 and 8.14. And the other role I have is to coordinate various sections of the lab a little bit.
