

## **Assignment 2**

### **Experimental Research Proposal**

This proposal should advance a novel neuroimaging investigation aimed to address any aspect of memory considered during the course.

**The proposal (approx. 10-15 pages) should describe:**

**The background**

**Experimental design**

**Analysis approach**

**Predicted results**

**Theoretical implications**

Proposals will be due on the last day of class and will be briefly presented (~15 minutes) during the final class meeting.
