Mapping Detroit – Marie Law
Location of "basins" from contours
Year: 2064

: water
1. The United Nations recommends that all
   inhabitions are to be located within 600 feet of a
   clean water source.

- All potential connections between
  basins and water sources

  - Ranges for necessary
  - additional water sources
- Basins and resulting relationships to water sources
- Dune transportation system
  connecting basins and sources
HORIZONTAL OBSTACLE

direction of prevailing wind

VERTICAL OBSTACLE

direction of prevailing wind
- Dune formation of 9 historic buildings

- small agrarian
- forest
- nomadic, temporary (edges)
- Accommodation for new growth through additional dune transport networking to redistribute or densify existing dunes.
