Progress Report 1

The Progress Report should be brief and reflect on your learning and the development of your project. The report should be approximately 1 page (250-300 words) in length and use an informal professional style.

This first progress report should reflect on the following questions:

1. What excites you about the project?
2. What do you think are the main challenges to this project?
3. What does your group see as the first steps to take on the project?
4. Do you anticipate any particular resources or assistance you will need to move forward on the project?
