At the end of the semester (next week), we will be giving a modest amount of grant funding to one or more of the projects that are presenting today. This money is to be used for the project(s) over the next year.

If you had $1,000 to give out to these projects, how would you split it up? You could give it all to one project, split it up between the projects any way you want, or not give it all out.

Example 1:
    Project 1: $0
    Project 2: $0
    Project 3: $1000

Example 2:
    Project 1: $600
    Project 2: $100
    Project 3: $0

Please write how you would distribute:

Project	Amount
Mantra (Internet kiosks)	$
Cell phone networking	$
Sodis (Solar water disinfection)	$
Total	$
