6.003 Homework #11

This homework consists of a single Engineering Design Problem, which is due on Wednesday, November 23. Because of the Thanksgiving holiday, revisions are due on Monday, November 28.

**Engineering Design Problem**

1. **Image reconstruction**

   The rows and/or columns of the following images have been blurred. Figure out a way to sharpen each image, and identify the building. Here are thumbnails of the images:

   ![ Thumbnails of the images ]

   The images are available in machine-readable form (buildings.zip) on the 6.003 website.
