Project Pitch

Team Coordinate
Purpose, goals and context

- students get takeout and want to coordinate currently do by texting, phone calls
- need system to coordinate orders
- system would automatically place the order goal is to make the process easier, quicker and more efficient
key features and concepts

* main feature is coordinating the menu orders amongst a (potentially large) group of students
* other key features will be placing the orders and keeping track of the deliveries
* the key concepts are:
  * restaurants
  * takeout orders
  * student
the app may be complex and getting it to connect to the restaurant’s servers may take a lot of work

risk of not being able to make a responsive interface; mitigation is using JQuery

risk of system not performing quickly enough; mitigation is optimizing code

the mobile component of the app may be hard to implement

not clear how to store the number of menus that will be required
6.170 Software Studio
Spring 2013
