- \( [C(v) - C(w)] \cdot [d(v) - d(w)] = 0 \)

- Direction of bar perpendicular to relative motion of \( v \) w.r.t. \( w \)

- Springs \( \neq \) bars
  - but like "weak" bars \( \sim \) resting length
  - lets you "feel" the stress

- Tensegrity sculpture
  - Kenneth Snelson
  - Tomohiro Tachi: Freeform Tensegrity
  - George Hart: build your own

- Project discussion
6.849 Geometric Folding Algorithms: Linkages, Origami, Polyhedra
Fall 2012
