How would you draw the figure below without lifting your pen from the paper?
Sometimes it is helpful to think in different dimensions.

Just to challenge the boundaries prescribed by our mental model 😊

so let us try another one:
How would you connect the nine dots below with the minimum number of straight lines without lifting pen from paper?
Well that is one way! Is there another?
Try folding it !!!

Can we apply such thinking when dealing with real world Critical Contemporary Issues?

We will try today
