Download Audacity

Version 2.0 or later

http://audacity.sourceforge.net/download
Install Audacity

Read the Instructions

Runs on all platforms, but installation differs.
Open Audacity
Audacity -> Preferences

In the Devices tab:
Make sure Channels is set to 1 (Mono)
Open Audacity Preferences

In the Quality tab:
Set Default Sample Rate to 8000 Hz
Create a New Audacity Document
Start Recording

... And press space to stop recording
Start Recording

... And press space to stop recording
For best results, change the mic volume before recording so the waveforms fill ~3/4 of height.
Effect -> Normalize
Trim Silence from Beginning and End

Select and hit Delete
Export
Exporting Prompts

Export as WAV
