Term Project Update, Feedback Summary

Annalisa Weigel
November 15, 2006
ESD.10 Meta-Learning Objective: Appreciate the political, social, and institutional context of technological systems

Current issues in technology and policy

Learning to see:
- Goals (equity, efficiency, security, liberty)
- Problem framing (symbols, numbers, causes, interests)
- Policy solutions (inducements, rules, facts, rights, powers)

Learning to analyze:
- Policy analysis toolkit (positions, powers, resources, channels, windows, technology constraints and enablers)
- Economics (cost-benefit analysis, pareto optimality, utility)
- Term Project (conceive, design, execute a policy research project)

Learning to articulate:
- Writing (policy memos, policy research studies)
- Dialogue (recitations, class discussions)
- Presentation (term project, group homeworks)

“Real world” experiences of policy practitioners
