24.191S15 LAUNCH QUESTION #8

WHY EAT LESS MEAT?

The website Why Eat Less Meat cites four major reasons to eat less meat: the efficiency of the global food system, the environment, health (both personal and public), and animal welfare. Which of these reasons to eat less meat do you find most compelling? Are any of these reasons (or the combination of them) compelling enough to make you think you personally should eat less meat? Why or why not?

(If you’re already vegetarian or vegan, focus on the first question!)
