

ScooterPower

Oct 10

What

- ScooterPower Corporation is an Automotive and Power venture developing *Products* for home use in developing markets.
- Our idea would allow people to use a motorbike both as a source of transportation and power generation
- Our team includes *VERY! Impressive Talent.*
- We don't know of any existing companies that offer similar technology

Why

- Size of market
 - India 2 Million +
- who has the problem
 - Anyone who does not have power and have the capability to own a 2-wheeler
- why is it worthwhile?
 - Collapses two purchases to one

How

- Still thinking ..
 - Attachments to the 2-wheelers that would convert mechanical energy to electricity
 - Hero Honda India
 - Manufactures Motor Bikes as well as Generators
