I. Finding $p(D)$

**Quiz:** Suppose $W(s) = \frac{1}{(s+2)(s+3)}$ is the transfer function for the system $p(D)x = f(t)$. What is $p(D)$?

**Choices:**

a) $e^{-2t} - e^{-3t}$

b) $D^2 + 5D + 6I$

c) $1/(D + 3)(D + 2)$

d) It doesn’t exist

e) Can’t be found with the data given

Pick what you think is the correct choice and then look at the answer.
