As you work on your site plan schematics you should continue to develop and investigate the concepts related to the alternative infrastructure /technologies you are working on. For March 5th site plan pin-up you should include a small poster indicating the components and attributes of your system as they relates to site development.

They should include
- Design principles
- Design techniques (construction)
- Future projection

**Due Date for preliminary findings: Feb 19**

**Format**
18X24 Poster with drawings and images explaining your findings – keep text on poster to a minimum.
